

For the medical examination for US immigration process you need to prepare:

- 1) 6 recent photos (3*4 cm) for each person
- 2) Valid passport and copy of the 1-st page(page with the photo)
- 3) Case number (bring your US Government appointment letter with you).
- 4) In order to assist the panel physician, and to avoid delays in processing of an immigrant visa, all immigrant visa applicants should have their vaccination records available for the panel physician’s review at the time of the immigrant medical examination. Visa applicants should consult with their regular health care provider to obtain a copy of their immunization record, if one is available. If you do not have a vaccination record, the panel physician will work with you to determine which vaccinations you may need to meet the requirement. Certain waivers of the vaccination requirement are available upon the recommendation of the panel physician. Only a physician can determine which of the listed vaccinations are medically appropriate for you, given your age, medical history and current medical condition. Missing vaccines are available in our hospital, but for additional charge.
- 5) Present address of residence and intended USA address, city, state with postal codes printed on the separate sheet of paper.

Table: Requirements for routine vaccination of immigrants examined overseas who are not fully vaccinated or lack documentation.

Vaccine	Age						
	Birth-1 Month	2-11 Months	12 Months-6 Years	7-10 Years	11-17 Years	18-64 Years	≥65 Years
